Dale / Roger,

good news. the results of EPA's sampling of the MS4 line for illicit revealed only some pharmaceutical analytes at very low levels (3x Reporting Limit).

on these results, we feel it is appropriate to discharge to the BMP.

as we'll document in an O&M Plan to be developed for the BMP, you'll want to re-sample for illicit on a yearly or semi-annual basis to ensure status quo.

i'll coordinate with my contractors to install the diversion wall for sometime in the near future.

let me know if you have any questions . . .
